#### **About Osmania University**

Osmania University, established in 1918, is the seventh oldest in India, the third oldest in South India and the first to be established in the erstwhile princely state of Hyderabad. It has significantly contributed to the academic and economic development of not only the region but also of the Country. It is a multi-faculty and multidisciplinary university, offering rich and varied courses in the fields of Humanities, Arts, Sciences, Social Sciences, Law, Engineering, Technology, Commerce and Business Management, Information Technology and Oriental Languages.

In recognition of its excellent academic achievements, Osmania University had the distinction of being awarded the 'A' Grade status by the National Accreditation and Assessment Council (NAAC) of the University Grants Commission, Government of India in the year 2008.

As the Osmania University approaches 100th anniversary it has evolved from a path breaking institution into an institution of high repute with global presence. The centenary is an important milestone which provides an occasion to celebrate our past achievements and deliberate on its future plan. The University being the oldest, multi-disciplinary, multi-faculty and largest affiliating University in the country.

#### **About the Department**

The Department, established in 1962, offers Post Graduate and Doctoral programmes in Management both to regular students and to working professionals. The programme aims at moulding students into effective managers by providing them with courses reinforced with multi-faceted inputs of management education using state-of-the-art methods of training and active industry interface. In addition to the regular MBA (Day) programme, the Department also offers MBA (Evening) programme to working executives and MBA (Tech.Mgt). The Department has collaborated with various organizations to offer exclusive Management programmes in specialized areas. The Department of Business Management provides affiliation to about 200 colleges offering MBA programme.

#### **About the Workshop**

Advances in computer applications during the past few decades have brought radical changes in the way information is gathered, store, organized, accessed, retrieved and used. The application of computers in information processing has brought several products and services to the scene. The Internet and the Web are constantly influencing the development of new modes of scholarly communication; their potential for delivering goods is quite vast, as they overcome successfully the geographical limitations associated with the print media. Further, the distribution time between product publication and its delivery has been drastically reduced. The

Internet can be used for efficient retrieval and meeting information needs. This is very important for university libraries since most of them call for more and more research work. This important fact is convincing many libraries to move towards digital e-resources, which are found to be less expensive and more useful for easy access. This is especially helpful to distant learners who have limited time to access the libraries from outside by dial-up access to commonly available electronic resources, mainly CD-ROM, OPACs and Internet, which are replacing the print media.

Learning the skill of writing the thesis report is essential to researchers. The structure and essential constituents of the thesis report is an indispensable part of the research exercise. A workshop on eResources and Thesis report writing is envisaged a necessity as it will help researchers to sharpen their knowledge and skill in accessing and storing information and also writing the thesis report.

The workshop will have as its objectives the following:

1. Conceptual clarity of the research process and methodology
2. Understanding the significant role of e-Resources for research
3. Writing abstracts, References and Bibliography
4. Understanding the method of thesis report writing
5. Writing research papers and identifying avenues for publishing
